

JA71-Pxx / Txx Switch Mounting Panels

Data Sheet

Description

The JA71-Pxx and JA71-Txx series of mounting panels allow the aircraft customizer to install a professionally finished panel for the ever-present extra switches.

The -Txx series of panels can accommodate 3, 4 or 5 standard aircraft grade toggle switches. (e.g. Honeywell TL Series or MS24523)

The -Pxx series of panels can accommodate 3, 4 or 5 square pushbutton switches (e.g. Korry Chromalux 389, Aerospace Optics Vivisun type I or III, Staco Systems Series 90)

All of these panels are manufactured as engraving-ready and can be laser engraved to suit the customer's requirements.

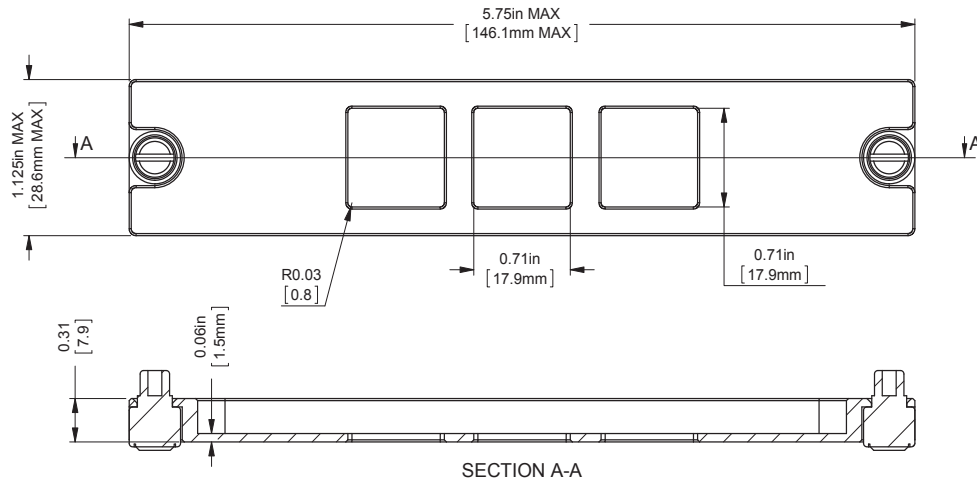

Jupiter includes two Switch Hole Covers in every order for your customizing needs.
