

Version: 0.48.1 Released: Feb 15, 2018

This release adds support for the JA95-51 and JA95-52 subassemblies, adds minor improvements and fixes some issues.

All Modules

Improved: Configuration Report now shows calculated Data Crc even when product is not connected. [Ken V Request]

JA37-600 J1 and J3

Changed: The Rx Audio Levels can now be adjusted when operating ProCS in R&D mode. [Andrew H Request]

Fixed: Pins 10/22 and Pins 13/25 were set to High Isolation Output, they must always be set to RX Input. [Andrew H Bug]

JA94-001

Changed: Data file updated to Dec 7, 2017 version to provide more adjustment range for receive input levels. [Andrew H]

JA95-001, JA95-N11, JA95-070, JA95-N70

Changed: Changed to work with the JA95-51 and JA95-52 subassemblies, which replace the ISL22343 devices with X9408 devices.

JRAC2-001

Fixed: The ALERT2 ENABLE line was incorrectly being enabled. It is now fixed to a High logic level, (active Lo, so this now disables ALERT2 ENABLE). [Andrew H]
